## **INTRODUCTION**

Bornean Sun Bear Conservation Centre (BSBCC) was established in 2008 as a collaborative project between Sabah Forestry Department (SFD), Sabah Wildlife Department (SWD), Land Empowerment Animals People (LEAP) and Malaysian sun bear researcher Wong Siew Te.

Located at Sepilok, near Sandakan on Sabah's east coast, the Centre aims to carry out sun bear conservation, education, research and rehabilitation and provide an improved long term living environment for confiscated bears that cannot be released back into the wild. The Centre has capacity for 40 bears in two bear houses as well as a quarantine building. A total of 42 bears were housed at BSBCC by the end of 2016.

Major milestones during the year included the completion of the second Observation Platform and Aerial Walkway at BSBCC, and the release of Lawa, the second rehabilitated sun bear to be reintroduced back to the wild.

Visitor numbers continued to rise, with BSBCC receiving 61,538 visitors in 2016 compared to 51,858 the previous year.

## **OPERATIONS**

### **Staff Training**

A Basic Tree Climbing Course organized by The Orang Utan Project (Sarawak) and Tree Monkey Project was carried out on 13<sup>th</sup> - 19<sup>th</sup> March 2016. The course was participated in by four BSBCC staff and was conducted at Sepilok Bed & Breakfast and My Nature Resort, Sepilok. A complete set of climbing equipment was donated to BSBCC at the end of the course.

## SUN BEARS

### Bear Arrivals

A total of 6 bears were sent to BSBCC in 2016. Wawa, a 4-month-old female was found alone at Forest Management Unit (FMU) 16 Pinangah, Telupid and was sent to BSBCC on 18<sup>th</sup> March 2016. On 27<sup>th</sup> April two adult sun bears, Along (6-year-old male) and Simone (8-year-old female) arrived. Both were rescued from the Tawau Hot Spring Mini Zoo.

Dodop, a 1-year-old female from Singgaron village, Ranau was handed over to SWD before being sent to BSBCC on 2<sup>nd</sup> June 2016. A member of the public surrendered Noah, a 5-month-old male to SWD after discovering the bear roaming alone in a fruit orchard in Nabawan. The last rescued bear was Nano, a 2-year-old male bear purchased by a member of the public in Kota Marudu with the intention to rescue him. Nano was quarantined at the Lok Kawi Wildlife Park, Kota Kinabalu before being sent to BSBCC on 20<sup>th</sup> November 2016.

### Sun Bear Reintroduction

On 25<sup>th</sup> July 2016, BSBCC released Lawa into Tabin Wildlife Reserve, the second sun bear to be rehabilitated at BSBCC for reintroduction back to the wild. Lawa was only one year old when she first arrived at BSBCC in May 2008. Growing up at BSBCC helped Lawa to develop many of the skills of a wild sun bear and she was found to be smart, agile and independent. Lawa was fitted with a satellite collar to enable further monitoring after her release. A helicopter was rented from Sabah Air

Aviation Sdn. Bhd. to transport Lawa into the core area of Tabin Wildlife Reserve and her movements were observed via GPS-satellite for 69 days. The last signal was received on 2<sup>nd</sup> September 2016 after which the satellite collar was believed to have malfunctioned and failed. There has been no further information or signs of Lawa since then. BSBCC sincerely hopes that Lawa can survive well in the forest.

### **Tabin Sun Bear Project (TSBP)**

The TBSBP is a long term project initiated in 2016 which will function as a platform to facilitate bear cub rehabilitation and research projects on rehabilitated and wild sun bears in Tabin Wildlife Reserve. SWD kindly allowed a field house in Tabin to be temporarily used by the BSBCC team and some minor renovations were carried out in December 2016. Kem Drum (5° 8'41.02"N 118°29'51.81"E) was selected as a potential base camp for the project. The Occupation Permit needed for the construction of the base camp to start was still in progress at the end of the year.

## Bear Escape

There were three incidents of bear escapes from BSBCC in 2016. On 2<sup>nd</sup> January, two adult female bears, Cerah and Jelita escaped from Pen K after an enclosure door was left unlocked after maintenance work. Both bears were successfully recaptured back to the bear house building with the help from Wildlife Rescue Unit (WRU) vet, Dr. Pakeeyaraj Nagalingam.

On 23<sup>rd</sup> August, villagers in Abai, Kinabatangan reported a wild adult male sun bear roaming around the village and breaking through the kitchens of their houses. A team comprising of BSBCC and WRU staff captured the bear (named Abai) and transported him to BSBCC the following day, with the purpose of attaching a satellite collar before releasing him back to Lot-5 of the Lower Kinabatangan Wildlife Sanctuary. Unfortunately the bear escaped from BSBCC's quarantine facility by damaging the cage bars on the morning of 25<sup>th</sup> August. Search and capture operations were carried out including live traps being set and night patrols. As of the end of 2016, no signs of Abai were found.

*Cage bars destroyed and bent by translocated bear Abai at quarantine cage-9, BSBCC.*

On the morning of 24<sup>th</sup> November, a sun bear cub, Tan Tan was found to be on a tree outside Pen D. She was believed to have escaped by climbing a tree in the pen which had fallen on the fence. The 1-year-old female bear was successfully recaptured back on the same day.

## Bear Deaths

BSBCC cared for a 13-year-old adult female sun bear, Teddy who was rescued in December 2015 from the Wilmar Sapi Plantation in Beluran, Sabah, after receiving a report that the captive bear was sick. Unfortunately Teddy's sickness was found to be severe and did not improve even after veterinary treatment. The vets, with support from SWD, made the difficult decision to euthanize the bear on 7<sup>th</sup> January 2016.

## Wildlife Welfare Project

In 2016 the Wildlife Welfare Project was organized by APE Malaysia in collaboration with BSBCC and AZA Orangutan SSP at the Melaka Zoo & Night Safari, Peninsular Malaysia. BSBCC staff Azzry, Mizuno and Lin May participated in the 2-week project which started on 6<sup>th</sup> November. The team managed to complete a new platform at the existing sun bear exhibit and upgraded climbing structures at the orangutan exhibit in the Zoo. Seminars on Orangutan Veterinary Medicine and an Advanced Husbandry Seminar for sun bears and orangutans were also conducted in conjunction with this project.

## VOLUNTEERS & INTERNS

### Bear Action Teams (BATs)

In 2016, six BATs group teams comprising 75 people worked at BSBCC through Outlook Expeditions and World Challenge, helping to repair existing perimeter walkways around the enclosure and tidy up construction materials around the bear house. The outside perimeter trails are used regularly by BSBCC staff to feed and monitor the bears in the forest enclosures. The trails are also daily used for enclosure maintenance.

Interns can gain experience in conservation on the ground while helping the Centre care for the sun bears and help spread the words about sun bears through the education and awareness programme. In 2016, a total of five interns from four institutions (University of Adelaide, Universiti Putra Malaysia, Universiti Malaysia Sabah and Universiti Malaysia Terengganu) were recruited.

## INFRASTRUCTURE DEVELOPMENT & MAINTENANCE

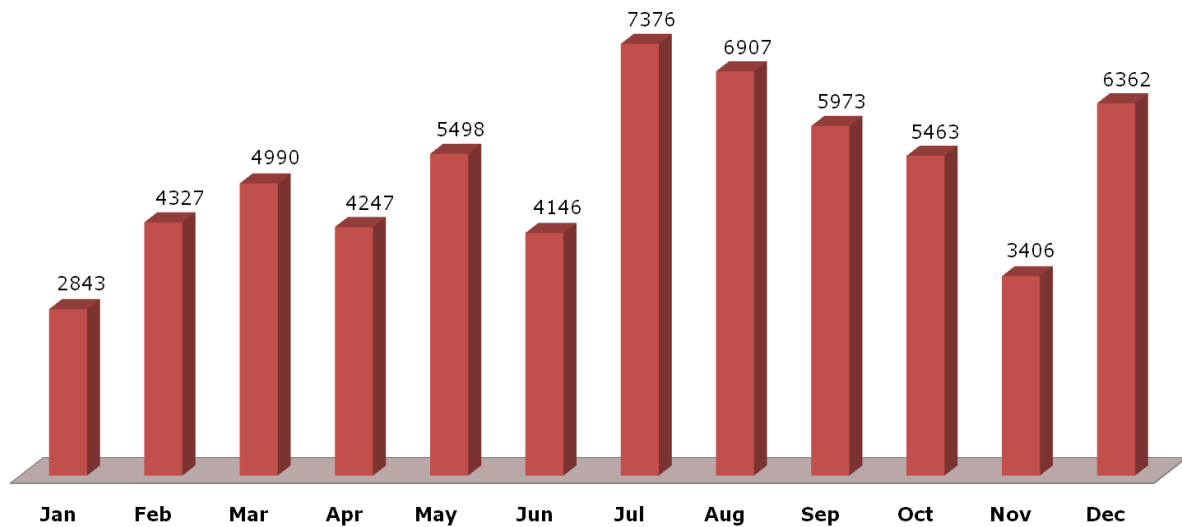

Construction of the second Observation Platform and Aerial Walkway was completed on 19<sup>th</sup> March 2016. The new structure was built as an extension of the existing boardwalk and has enabled the Centre to cater for the increasing number of visitors to BSBCC. After the completion of the aerial walkway, two “tie-on” reinforcement structures and two supporting towers were installed to prevent the walkway and platform from wobbling. These additional support structures were completed in October 2016. The structure was funded by Sime Darby Foundation.

# Sun bear with GPS collar released

**SANDAKAN:** The Borneo Sun Bear Conservation Centre (BSBCC) has released a female sun bear named Lawa back into the rainforests of Sabah with collaboration from Sabah Wildlife Department (SWD).

The transfer on July 25 at 11.00am following a final medical check up a day before by Dr Ross Stansfield from SWD involved a short helicopter flight from the release location.

Upon arrival, Lawa dashed out of her translocation cage without any hesitation and disappeared into the pristine woods of the Tabin Wildlife Reserve.

Lawa is carrying a GPS satellite collar which will enable the BSBCC to monitor her movements on a regular basis.

BSBCC founder and chief executive officer Wong Siew Te said Lawa was brought to the BSBCC in Sepit as an orphaned cub in 2000 and had been prepared ever since then to return to the forest, where she came from and where she belonged.

"She has undergone rehabilitation training for eight years, learning all essential skills a sun bear needs for survival in the wild, such as nest building, foraging and being able to fend itself. All of these trainings were made possible as the state of the art national forest reserves at BSBCC," said Wong.

Wong also said Lawa's release came to fruition as a joint effort by "our most amazing partners, the Sabah Wildlife Department, the Sabah Forestry Department, DEAP, the Tabin Rangers, the BSBCC team, our volunteers, everybody who participated in the cross-funding who helped and supported us generously in Lawa's release."

"The release of Lawa into Tabin Wildlife Reserve is the second release after Natalie, which was released into the same place and in a similar method in May last year. Natalie was successfully monitored for about two months in the forest where she roamed an area of 34.9 sq km.

"After Lawa's release, BSBCC currently is home to 48 rescued sun bears and the responsibility and cost to help take care of these bears are huge," added Wong.

Meanwhile, Sabah Wildlife Department director William Daye commended BSBCC for initiating the release project.

"The release of Lawa is a sign of BSBCC's success and I believe more bears will be released into the wild in the near future," Wilton said.

Sun bears are protected by law in Sabah under the Wildlife Conservation Enactment 1997, with offenders facing the prospect of up to five years in prison and/or a maximum fine of RM50,000.

Sadie, however, that has not stopped some opportunistic local and regular poachers alike from continuing to try and snare or shoot bears in the state's forests.

"Our department would like to issue stern warning to those who continue to poach sun bears and other protected wildlife species. We will take action against those who are found to be involved in such activities," Daye said.

**Dr Ross, Wong Siew Te (right) and BSBCC team perform a full health check at the bear's mouth to make sure Lawa is fully ready for the release.**

**Lawa dashes out from its translocation cage immediately.**

## **Oral Presentations & Conferences**

The conference was held on 8<sup>th</sup> – 9<sup>th</sup> November 2016 at the Magellan Sutera Harbor Resort, Kota Kinabalu. Wong presented on “The Status of sun bear in the Lower Kinabatangan Segama Wetlands (LKSW) and adjacent areas in Sabah”.

### *8th East & Southeast Asian Wild Animal Rescue Network (WARN) Conference*

Wong and Azzry attended the 8<sup>th</sup> East & Southeast Asian Wild Animal Rescue Network (WARN) Conference from 31<sup>st</sup> October – 3<sup>rd</sup> November in Cha-am, Thailand.
