How do you inspire other people to care about sun bears?

Make your own sentences using each unscrambled word from part 1. Write a paragraph with some of your sentences to create interest in sun bear behavior. Remember that sun bear behavior helps to keep the rainforest thriving.

Consider the following concepts for a direction or develop your own.

1. **FOREST PLANTERS.** Sun bears disperse fruit seeds throughout the forest through their droppings
2. **FOREST DOCTORS.** Sun bears keep termite populations under control and trees healthy.
3. **FOREST FARMERS.** Sun bears mix the forest soil by digging for earthworms, ants and beetle grubs, just like farmers plow their farms before planting.
4. **FOREST ENGINEERS.** Sun bears tear open tree trunks to reach honey and this activity creates nesting sites for other wildlife.
