

Unscramble the words and learn about the interesting behaviors of sun bears. (Part I)

# behavior

Sun bears in Borneo live in the forest. They are so clever at \_\_\_\_\_ themselves in the **ghindi** trees that they are almost never seen in the wild.

Sun bears are omnivores. They feed on termites, ants, beetle larvae and many types of fruits. They love \_\_\_\_\_ and are sometimes called "honey bears".

Sun bears use their \_\_\_\_\_ **srto gn** claws to tear open tree trunks to reach honey. This creates cavities in trees that other animals can use as nesting sites.

Sun bears are superb \_\_\_\_\_ **bercmils** Sometimes they climb trees by hugging the trunk with their front limbs and by gripping with their strong teeth .

Sun bears eat over 100 insect species and over 50 plant species. Most often they find food using their keen sense of \_\_\_\_\_ since their eyesight is poor. **lmels**

By \_\_\_\_\_ for invertebrates **ggginid** on the forest floor sun bears help to cycle nutrients and keep the soil healthy. Sun bears mix the soil with their claws just like farmers do before planting.
